

DoveaGENETICS

Maximizing Your Herd's Genetic Potential

**2017 BEEF
DIRECTORY**

Welcome to the Dovea Genetics 2017 Beef Directory. We have put together what is undoubtedly in our opinion our best ever selection of beef bulls. The investment Dovea has placed in beef genetics is evident to see within our directory with a large number of bulls becoming proven complimented with recent young bulls purchased for our beef line up. We would suggest you talk to one of our Area Representatives to make sure you are selecting the right bull for your production system.

The introduction of genomic information in the compilation of the beef indices in 2016 has been a first in the world. The genomic information collected since the introduction of the Beef Data and Genomics Programme (BDGP) by the Department of Agriculture, Food & the Marine has been utilised to produce genomic proofs for young bulls. We are delighted that the majority of our bulls have qualified for the replacement strategy section of the BDGP.

Please note that there will be updates to the indices (Terminal & Replacement) by ICBF during the year so the figures of individual bulls will change. It is important to consult with your Area Representative or A.I. Technician that the bull or bulls you have selected still qualify.

We wish to grow and develop our beef programme for both our Irish and international customers. Dovea Genetics has exported beef semen to over 20 countries in 2016. The feedback from our genetics in foreign countries has been super which is very encouraging to see Irish beef genetics performing on a world stage. The success and growth of our beef programme will ensure more beef bulls are purchased in the future. We are always striving to improve so to ensure this we would love to hear your feedback on any beef semen related matters.

Good luck with your breeding in 2017 from all in Dovea Genetics.

Dr. Ger Ryan
General Manager
Dovea Genetics

Semen Royalty

There are a number of bulls in the catalogue noted as semen royalty sires. This means that any pedigree calf registered from these bulls is liable to a semen royalty charge when the pedigree calf is registered. The semen royalty fees are available from our office in Dovea Genetics or from the Dovea Genetics website.

Health & Safety

Health and safety has become an important issue on Irish Beef Farms. For our A.I. technician's safety and to achieve the best conception rates, proper handling and restraining facilities must be in place using A.I.

Semen Storage

It is important to note that preordered semen stored in Dovea Genetics AI Technician's tanks is at the farmers own risk. Please feel free to contact our distribution personnel in Dovea if you have any queries re same.
